

**WWL GROUP**  
**YOU DECIDE. WE DELIVER.**

## **WORLDWIDE LOGISTICS(INDIA) PVT LTD. TRANSGLOBAL LOGISTICS WORLDWIDE LOGISTICS LLC**

Developed Economies across the world controlled the lions share of the Global economy in the past decades and as a result logistics services providers in these economies innovated constantly to keep pace. The major logistics players in these economies were also quick to identify the opportunities and had the first mover advantage when the developing economies like India embraced Globalisation. It was under these circumstances that Worldwide Logistics began its Indian operations as the Indian subsidiary of Worldwide logistics Inc, USA at the dawn of the New Millennium. Through a strategic management buyout this Indian subsidiary subsequently became a fully owned Indian Enterprise as a part of now renowned WWL GROUP spreading across the length and breadth of India.

Worldwide logistics, the flagship company of WWL Group is indeed inspired by the entrepreneurship displayed by several Indian Business houses during this decade across several industries. However the group saw a dearth in the availability of India based Logistics organisations that can keep pace with this new face of the Indian industry which is not just Indian but fast becoming global and growing at phenomenal pace. This gap is seen as the biggest opportunity for Indian logistics companies to evolve, learn and grow along with the emerging Leader in the Global economy-INDIAN INDUSTRY. In the runup towards this goal, we are charting a vision document for the group which will encompass our objective to go global both directly and through strategic arrangements in the key global economies with the help of our international partners.

Worldwide logistics has today graduated from providing traditional freight forwarding services in the initial years to become one of the professional choices available to the industry to offer range of Supply Chain Solutions that is customised to every individual customer. The core objective in our service offering has always been to meet the expectations of our Esteemed Customer's Customer. From a mere 10 employees & 3 offices to over 400 employees and 20 offices, Worldwide Logistics have grown to become one of the sought after service provider by our customers globally. Together with our global partners, we remain at the forefront of the logistics industry, by providing customised service offerings which bring value to our customers. Indeed, we pride ourselves in tailoring Service solutions that best suits our customers' requirements by deploying professionally trained personnel in order to understand their need before offering multiple solutions and showcasing their respective benefits for our customers to choose from. The speed of our service offerings and the expertise of our employees will ensure that our customers will always realise the intended benefits while utilising our services.

One of the key Management Philosophy in Worldwide logistics has been to bring in the best people to manage the necessary service offerings, produce benchmarkable processes, bring tomorrow's technology and integrate all of them in delivering a robust value chain to our customers worldwide. We fully realise that we have to constantly innovate in order to ensure that our customers stay competitive in their respective businesses which is when our businesses also grow. It is this philosophy that has ensured that a large no of our customers have been utilising our services ongoingly for all of their supply chain requirements.

Worldwide logistics is committed to offer delightful customer service that brings tangible difference in the profitability of our customers. We always work hard to build trust, Loyalty and to sustain longterm partnership with our customers globally.

## INTERNATIONAL FREIGHT FORWARDING

### WORLDWIDE LOGISTICS (INDIA) PVT LTD

IATA ranking 6th in Chennai, 46th in India, 321st in Asia Pacific

- Air Import
- Air Consolidation
- Sea Imports

### OUR REACH

Chennai, Tuticorin, Coimbatore, Tirupur, Bangalore, Hyderabad, Mundra, Mumbai, Ahmedabad, Aurangabad, Delhi, Panipat, Kolkata

### PROVEN EXPERTISE IN INTERNATIONAL FREIGHT FORWARDING

## 3PL WAREHOUSING & DISTRIBUTION SOLUTIONS

### BACKGROUND

The trend among most companies so far was to have a large number of regional warehouses. This was due to the problems in accessing their wholesale and retail outlets in time caused by the dilapidated roads. For companies the savings in administrative problems and cost overheads by maintaining a consolidated warehousing structure is immense.

Corporates are now planning to shift to a central warehousing model, courtesy the improvement in the roads network due to the ongoing National Highway Development Projects and the possibility of a Value Added Tax regime coming into place.

### CHALLENGE

Companies looking forward to improving customer service and timeliness of deliveries will be shifting to a central warehousing structure. These companies are much more likely to seek the assistance of logistics providers to manage inventory and supply chain links. Companies are moving towards a shared warehousing structure. However, then this is a time consuming process.

### SOLUTION

#### MULTIUSER CENTERS

WWL provides a network of multi-user warehouses, enabling manufacturers to hold inventory at local level, whilst avoiding expense, dedicated storage solutions. These facilities can receive product from both local and global manufacturing sites, providing downstream distribution.

#### INDUSTRY-SPECIFIC MULTIUSER CENTERS

The mega-store concept provides multi-user warehouses to house and handle the inventory of several manufactures for a defined geographical area.

By applying economies of scale in warehousing and consolidating orders for identical drop points, significant cost savings can be delivered.

### INBOUND CONSOLIDATION CENTERS

- Consolidation of parts from vendors.
- Stock optimization across the complete network.
- Guaranteed performance against agreed business rules.

Our customized solutions provide the most efficient and responsive service performance throughout your supply chain.

### LOGISTIC CENTERS

WWL Centers are being planned as regional centralized facilities offering:

- Order processing.
- Outsourced repair facilities.
- Custom final assembly.
- Kitting services.

### DEDICATED RDC SOLUTIONS

The DC (Distribution Center) concept is a range of warehousing facilities escalating in size and geographical importance.

RDC- the Regional Distribution Center may serve a group of locations, potentially feeding bulk stock into local warehouse facilities.

### RESULTS

Investment in their supply chain and distribution center network has been an important factor in driving growth and margin improvement for companies. As a result, the distribution strategy has evolved to the extent that new distribution centers have increased in size and have benefited from increased automation. Companies have also been able to benefit from best practice sharing in developing their distribution and logistics strategy.

## CONSULTING SERVICES

**Logistics master Plan:** is a systematic approach to logistics reengineering based on the logistics-planning pyramid. The LMP process defines performance measures and goals, processes, system requirements, and organization requirements for the customer service and order processing, inventory planning and management, supply transport and distribution and DC operations. LMP short-term and long-term recommendations are evaluated and time phased with the principles of incremental justification and implementation. The LMP process requires the client to assemble a cross-functional logistics planning and management team. LMP deliverables include detailed, prioritized and scheduled short and long term actions for performance measures and goals, processes, information systems and organizational design; logistics information system requirements; detailed material and information flows; and detailed organizational and training requirements. In short, our methodology is simple and split into three processes Investigate, Introspect, Innovate & Implement.

**Supply Chain Operations consulting:** Sustaining operational performance is critical if organizations are to meet their stakeholders' demands. WWL's core capability is our understanding of front and back-office operations. Our ability helps us quickly analyze the needs of a business and design and implement effective, creative new processes.

**Service Provider Evaluation and Benchmarking:** Benchmarking has become more commonplace in recent years as managers sought to improve their firms operations by examining strategic practices of leading companies. We at WWL focus on benchmarking logistics among our clients. We explore the relationships between benchmarking practices and selected organizational variables. Mostly benchmarking relates to size, internal and supplier

performance measurement, organizational formalization and technology adaptation.

**IT Systems integration:** WWL has carefully constructed blend of IT services Spans strategy, management, infrastructure, sourcing, integration and package solutions. We provide independent advice and support to organizations to meet all their business needs.

**Freight Audit and freight optimization services:** Freight Auditing: with complicated supply chains spanning the globe, logistical issues can make or break profit margins. Just-in-time process management means you may rely on suppliers to deliver at the last minute or hold inventory until you have space. Enterprise systems that are operating your departments will decrease the number of transactions processing personnel result in fewer controls at the point of payment. Shipping and receiving departments, and not accounting now take on responsibilities to match purchase order information and add their approval to the transaction cycle. WWL will review Freight Auditing and indirect spending to identify and recover the types of low occurrence overpayments most common to manufactures, such as freight overcharges, missed rebates, unit of measurement issues, non-compliance with tiered or indexed pricing, and approval of erroneous invoices.

**Freight Optimization:** WWL will compare your company's costs, operations, and services against industry benchmarks to find the segment of your logistics services that should be improved. WWL will use geographic mapping to obtain a visual description of your company's product flows and will prepare models that calculate what your expected logistics costs should be under varying scenarios. WWL will also prepare a strategic plan for improving your operations, which will include projections of the benefits that you will obtain when the plan is implemented.

## 5PL SERVICES

5PL is the disintermediation of the excessive channel members of a supply chain using human resource and IT disciplines to transform a company into a V-org. 5PL logistics really means that the traditional logistics departments become nothing more than an integrated information chain between buyers and carrier.

We aid our clientele to supplement their organization with temporary and contract staff for logistics and supply chain functions. WWL is dedicated to helping you finding the right people to fill your requirements. We identify qualified candidates whose skills match the specific disciplines you require. Whether your needs are temporary, short-term or permanent, WWL has highly motivated professionals to accomplish your goals.

### THE WWL ADVANTAGE

- Flexibility in hiring
- Cost and time saving in hiring process
- No permanent liability of people
- Availability of experts for short duration/project related work
- Large resume data bank
- Statutory obligations such as workmen's compensation, provident fund, gratuity, bonus, maternity benefits, professional tax, etc. are no longer a client's responsibility

## FEATURES

- Global Network through TKM Lines
- Authorized by key ports/customs to act as NVO
- Experienced professionals
- Effective Slot/Agency Contracts
- Round the Clock services
- Track and Trace Facility

## BENEFITS

- Larger visibility in key markets
- Increased imports / exports market share
- Seamless process to customers and agents
- Quick and Easy access to agents for representation in India
- Helps understand Agent's / Customer's needs effortlessly
- Helps to anticipate, preact and resolve complex issues on time every time
- Competitive Freight Rates
- Helps Agents/Customers worldwide to make timely decisions
- Effective technology tool to access container information online

## SEA FREIGHT

### IMPORT FORWARDING

#### FEATURES

- Confirmed Contracts
- LCL Consolidation
- Weekly updates of status of Consignments
- Update on Weekly Sailing Schedules
- Best lead Times
- Deliveries into Inland Ports
- Error-free Documentation
- Facilitate Stock Planning

#### BENEFITS

- Tangible cost reduction
- Tangible manpower reduction
- Reduction in Inventory Carrying Costs
- Efficient Supply Chains

### EXPORT FORWARDING

#### FEATURES

- Global network
- Confirmed allocation of Containers per Vessel
- Fast and Slow Vessel Options
- Special service contracts for space & rates with CMA- CGM, SCI, APL and Hyundai to Europe and USA
- Best Transit Times
- Buyers Consolidation
- Standardized Documentation Procedures
- Excellent Rapport with Carriers, Handling Agencies and Customs
- Proof of Delivery
- Efficient follow up for Post-Shipment Documentation

#### BENEFITS

- Competitive prices
- Meet deadlines on transits
- Option to choose fast or slow service based on requirement
- Special service contracts insulates our customers from price rise for a fixed period of time
- Special service contracts enables us to determine transit times in advance
- Buyers consolidation helps buyers to track and get deliveries of their shipments up to their works from various suppliers across the globe, in one container

## AIR FREIGHT

### IMPORT FORWARDING

#### FEATURES

- Single Window Feedback System (SWFS)
- Global Network of over 120 offices in over 60 Countries
- Provide Proactive Communication
- Error free Documentation
- On Time Delivery
- Excellent rapport with Statutory bodies
- Competitive contracts with Carriers
- Differential product range
- Professional Sales Approach

#### BENEFITS

- Less time spent on follow-ups
- Structured S.O.P's defining Standard Processes
- Less Manpower invested on Imports
- Tangible Reduction in Direct and Indirect Costs
- Defined Product, Customized according to the needs of the Customer

### EXPORT FORWARDING

#### FEATURES

- Global Network
- Trained professionals
- Competitive Freight Rates
- Round the Clock services
- Post Shipment Follow-Ups
- Track and Trace Facility
- Proof of Delivery
- Online Communication including Pre-alerts and Documents
- Differential pricing
- Pro-Active Communication
- Easy to understand Tariffs

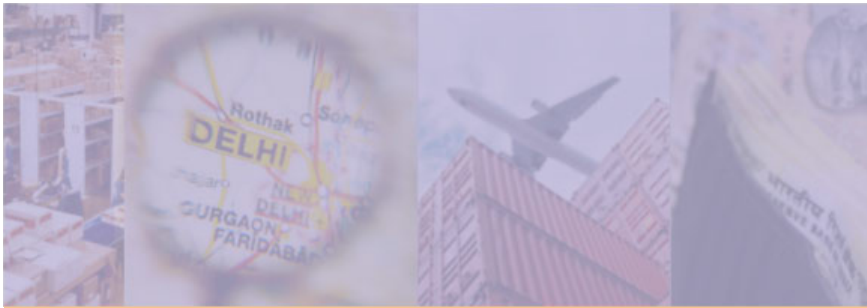

#### BENEFITS

- Less time spent on follow-ups
- Structured S.O.P's defining standard processes
- Less Manpower invested on Imports
- Tangible reduction in Direct and Indirect Costs
- Defined product, customized according to the needs of the Customer
- Allows the customer to decide alternatives at short notice
